

Priyadarshani Kumari

AI/ML Engineer | Generative AI | LLMs | Python | FastAPI

Mumbai | +91-7205249903 | priyadarshani221994@gmail.com | LinkedIn: priyadarshani-kumari-4b04671b2

Professional Summary

Results-driven AI/ML Engineer with 7+ years of IT experience including 3+ years of experience in Artificial Intelligence, Machine Learning, Deep Learning, and Generative AI. Hands-on experience in building AI solutions using Python, LLMs, Prompt Engineering, FastAPI, and Vector Databases. Experienced in data preprocessing, validation, model evaluation, and backend AI service development. Exposure to Linux environments, Docker, GPU inference workflows, and enterprise-grade AI deployments.

Technical Skills

Programming	Python, SQL
AI/ML	Machine Learning, Deep Learning, NLP, CNN, Generative AI
LLMs	LLaMA, Mistral, Prompt Engineering, Structured Outputs
Frameworks	TensorFlow, PyTorch, Scikit-learn, FastAPI, Flask
Vector Databases	FAISS, Chroma
Cloud & Tools	AWS, Azure, Docker, Linux, Git
Data Handling	Pandas, NumPy, Data Validation, Feature Engineering
Deployment	Model Deployment, GPU Inference, Backend APIs

Professional Experience

- Worked with AI/ML pipelines including data preprocessing, transformation, and validation.
- Developed machine learning models for classification, regression, and forecasting tasks.
- Built Deep Learning applications such as Face Mask Detection using CNN.
- Worked on LLM-based automation and prompt engineering workflows.
- Built backend APIs using FastAPI/Flask for AI model integration.
- Performed model evaluation, troubleshooting, and optimization for inference performance.
- Exposure to Linux environments, Docker containerization, and GPU-based workflows.
- Worked in enterprise support and regulated environments under Airtel Payments Bank payroll operations through Nehish Software Solutions.

Projects

Telecom Churn Prediction

Developed ML models for customer churn prediction using classification algorithms and feature engineering.

Face Mask Detection

Built a CNN-based deep learning model for real-time face mask detection.

Stock Price Prediction

Created forecasting models using time-series analysis and machine learning techniques.

LLM Automation Use Case

Worked on prompt engineering and structured outputs using open-source LLM concepts and automation workflows.

Education

Bachelor of Technology (B.Tech)
